

Quality care gaps report

Medical coding is key to documenting patient care and closing quality gaps. It also allows providers to receive credit for the services they provide to our members.

Aetna Better Health® of Illinois now provides monthly care gaps reports to providers.

These reports — **with a detailed billing view** — show our members assigned to your care with open care gaps. You can use this data to identify claims that need additional coding. You'll also see your potential pay-for-performance (P4P) earnings from correcting submitted claims.

Why it's so important

By correcting claims, you can close HEDIS® care gaps and receive incentive payments for the care you provided.

What you can expect from us

- ✓ Care gaps reports will be in Availity.
- ✓ Your Quality Practice Liaison (QPL) will review your most recent care gaps report at your next meeting.
- ✓ Our Provider Relations team can offer support on the process of correcting claims.
- ✓ Training sessions, tip sheets and other educational materials will be provided.

Seamless data transfer

A supplemental data exchange feed (SDS) allows you to submit clinical data — going beyond the standard claim.

Do you have an SDS feed?

- ✓ Allows for a comprehensive assessment of population health and HEDIS® performance
- ✓ Identifies and addresses open care gaps
- ✓ Helps improve overall HEDIS® performance
- ✓ No cost to set up

Questions?

Contact your QPL for support with HEDIS®, P4P and setting up your SDS feed.
